

A circular inset image shows a man and a woman embracing on a couch in a living room. The man is wearing a grey t-shirt and blue jeans, and the woman is wearing a white top and blue jeans. They are both smiling. In the background, a man in a blue uniform is visible, possibly a mover. The scene is set in a modern living room with a large window and a lamp. The overall tone is warm and comfortable.

# Comfort You Can Grow With

Think of it as a **solid investment in the future** — yours and the environment's. A WaterFurnace Premier geothermal comfort system is one of the best-performing, highest-quality heating and cooling systems available. The Premier Series will provide your family with **years of comfort and reliability**. Because it uses the earth's endless supply of free energy — instead of burning fossil fuels — it operates at a **fraction of the cost** of ordinary systems, while protecting the environment. And with the best warranties in the industry, you can **be assured** of safe and worry-free operation from day one.

# Geothermal's Natural Advantages

Premier geothermal units operate up to four times more efficiently than ordinary systems, such as natural gas, propane or fuel oil or conventional air conditioners. These efficiencies give them the lowest operating costs of any heating and cooling system. By using the free energy stored in the earth – instead of burning expensive fossil fuels – your Premier unit will save you up to 60% on your monthly utility bills. Free hot water heating is available as an accessory, further reducing your utility bills. With a Premier unit, you can say goodbye to the days of uneven temperatures and those annoying blasts of hot or cold air. The Premier provides consistent, even temperatures and humidity control.

## Safe and Environmentally Responsible

Because it doesn't burn fossil fuels, the Premier doesn't emit harmful greenhouse gases, which are associated with global warming. No flames. No fumes. No odors. And no danger from carbon monoxide in your home. You'll also benefit from less dust and better indoor air quality.

## Reliable

Sophisticated microprocessor controls and state-of-the-art components enable years of virtually maintenance-free operation.

## Custom-tailored Comfort Control

The addition of an Intellizone® system to the Premier allows you to regulate comfort levels throughout different areas (or zones) to suit everyone's comfort needs. You can keep the bedroom a different temperature from the living room with the touch of a button.

## Features

- Galvanized steel cabinet is painted with durable poly powder paint for long-lasting beauty and protection.
- Choice of PSC or multi-speed ECM blower motor.
- Optional electronic air cleaner provides ultra-high air filtration with 97% efficiency down to .3 microns.
- Standard E-coat air coils prevent corrosion and leaks.
- From their high-tech microprocessor to its zinc plated finishing screws, all units are built to exacting standards and run-tested before delivery.
