

A photograph of a baby in denim overalls being held by an adult in a kitchen. The baby is smiling and looking towards the camera. The adult's hands are visible, holding the baby's hands. The background shows wooden kitchen cabinets and a white appliance. A large blue curved graphic element is on the right side of the image. In the bottom right corner, there is a white rectangular unit with blue panels, identified as a WaterFurnace Synergy3 geothermal furnace.

Synergy3 – Comfort From Head to Toe

Designed for discerning homeowners, **WaterFurnace's Synergy3** geothermal heating and cooling system is unsurpassed for **comfort and efficiency**. By combining the benefits of radiant floor heating with state-of-the-art geothermal heating and cooling, we've created perhaps the world's **finest home comfort system** – all in one reliable and quiet unit. And because the Synergy3 uses the free and renewable energy found in your own backyard, it operates at a **fraction of the cost** of ordinary furnaces or boilers.

Advantages of Synergy

Your WaterFurnace Synergy³ system will provide superior comfort and remarkable performance from day one by integrating the comfort of radiant floor heating with the benefits of geothermal technology. Compared with ordinary furnaces or boilers, the Synergy³ is a whole new world of home comfort, with forced air heating and cooling to ducted zones and hot water for radiant floor zones. If you've never experienced this total home comfort, you're in for a treat.

Radiant floor systems use a series of tubes encased in the floor. By circulating hot water through this tubing, the room is comfortably warmed. Because the floor acts as a giant radiator, you'll experience head-to-toe comfort throughout the room. Floors covered in tile, wood, vinyl or stone stay toasty, even on the coldest days. The Synergy³ also heats with forced air through the duct system. Set your thermostats, relax and enjoy warm, consistent temperatures throughout your home.

During the cooling season, the system will automatically reverse to provide cool, dehumidified air for air conditioning through the duct system. Quietly and efficiently—with no noisy outdoor unit to detract from the peacefulness of your backyard — Synergy³ allows you to enjoy your home, inside and out.

And because this system uses geothermal technology, you can be assured of low energy costs, minimal maintenance, long equipment life and quiet operation.

Personal Enjoyment

Your comfort system is backed by a strong warranty program to assure your peace of mind. Your Synergy³ unit comes standard with 10-year, all internal parts coverage. Other warranties with different terms also are available — contact your dealer for more information. Whichever warranty you choose, your system will provide many years of comfort, energy savings and reliability.

Synergy³ Features

- High efficiency geothermal technology provides you with lower operating costs than ordinary furnaces, boilers, air conditioners or heat pumps. Save up to 60% on your monthly energy bills.
- Forced air heating and cooling from a single unit provides you with versatile comfort, with no outdoor unit.
- Water heating provides hot water to radiant floor applications for ultimate heating comfort.
- Copeland Scroll[®] compressors ensure years of efficient, reliable, quiet performance.
- Variable-speed blower motors for quiet, comfortable operation.
- Microprocessor control provides intelligent staging and control options, with LED diagnostics for easy servicing.
- Poly powder-coated finish (white) on heavy-gauge metal cabinet offers years of protection.
- E-coated air coil provides superior corrosion protection.
- No combustion, flames, flues or carbon monoxide concerns.
- Qualifies under the EPA's ENERGY STAR[®] program, and certified by Air Conditioning & Refrigeration Institution and Electronic Testing Laboratories to ensure performance and safety standards.
